

**ABSTRACT OF THE DISCLOSURE****AUTOMATED ELECTRONIC MESSAGE FILING SYSTEM**

5           A system, system, and program for efficient filing of electronic messages in a filing system are provided. At least one filing folder is suggested for filing a particular electronic message. The suggested filing folder is graphically distinguished from the remainder of the folders in the filing system, such that selection of a folder for filing an electronic message is facilitated. In particular, a suggested folder name may be attached to an electronic message  
10 before it is sent. Then, when the electronic message is received and to be filed, the suggested folder is the one bearing the name of the suggested folder name attached to the electronic message.
